CHECKOUT

SOS (SECO ONLINE STORE

- Open Current order
- Fill in your shipping option and put your delivery address into the Address Book
- Personalize your purchase order number
- Submit order

Order placed

• Get update on your order within minutes

A SMALL UPGRADE

Upgraded "engine"

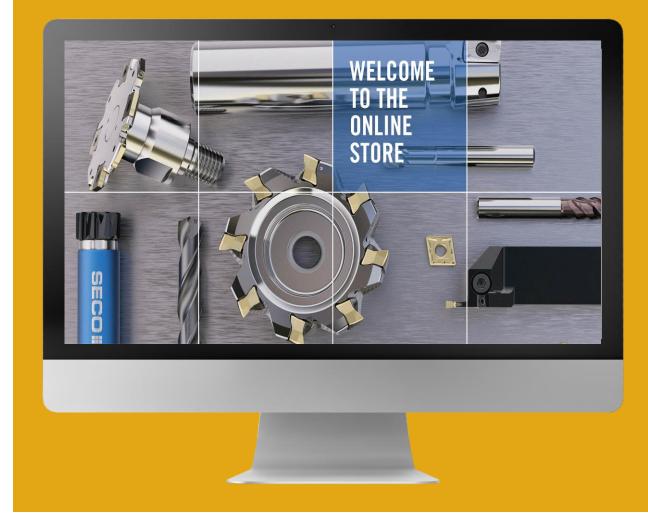

A major upgrade on the back-end part, the "engine", which enables a lot more functions in the future and secured a stable and working store for years to come. This latest project is considered a "one to one" upgrade so you might not notice that much change when it comes to basic functionality, but this is a prerequisite to be able to meet all higher expectations in the future.

A better Seco Online Store

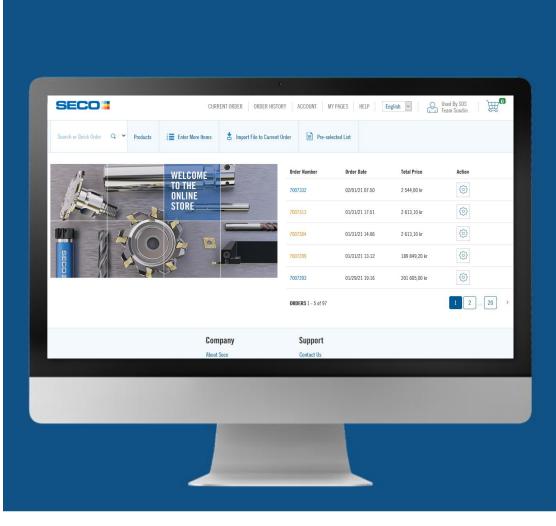

The online store needed an upgraded look. The experience was previously heavily down prioritized which means that it almost looked like a different brand than Seco. We took advantage of the project to do some well-deserved changes. We also decided to make the store mobile friendly with tablet views coming soon.

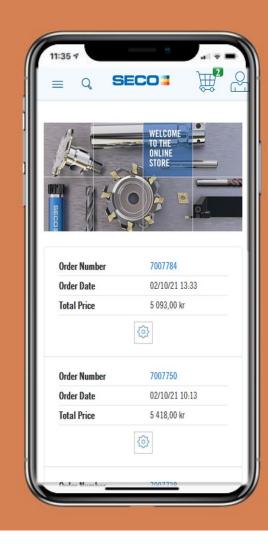

Same login, just keep on working

If you already have a user, the same credentials are still working. If you for some reason are lacking a user, please contact your sales representative.

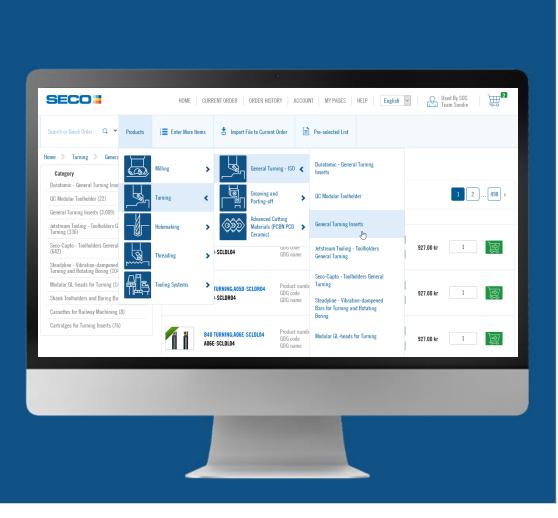

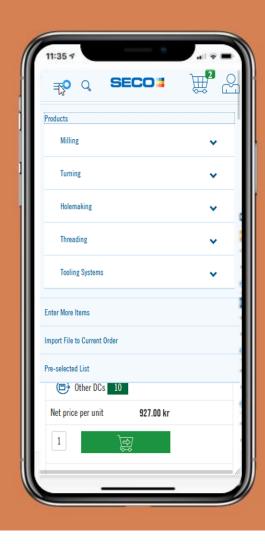

A BETTER WELCOME

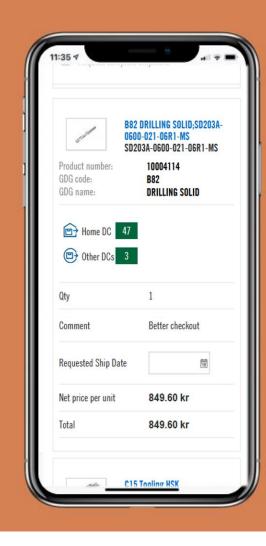

BETTER LOOKING NAVIGATION

A BETTER CHECKOUT, WORKING IN MOBILE

ALP

IMPORT FILE TO CURRENT ORDER

Import a list of products

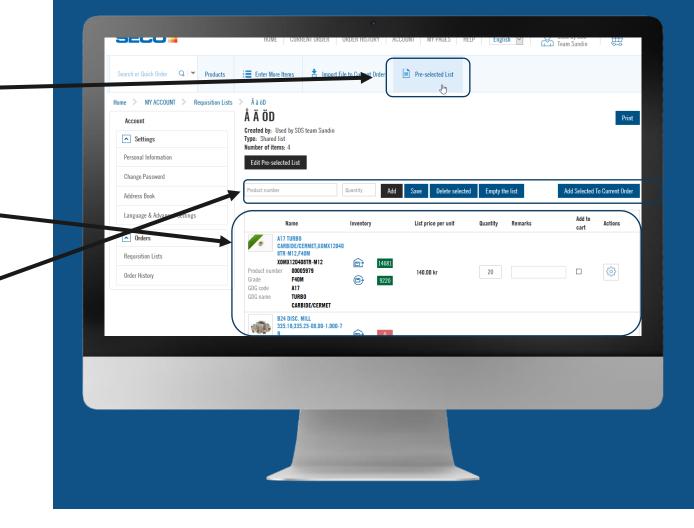

- Import a file with products, from e.g., your procurement system
- The CSV/TXT file must have a header row, for example Product Number/Quantity. Each following row must contain a valid product number, followed by a quantity, separated by semicolon (;), for example 00005979;20
- Importing the file adds the products to the current order

PRE-SELECTED LISTS

Save and use a list of products

- If you need a list of products to be purchased often, at a later stage or to be shared with your colleagues
- Create lists of products for a specific machine, an assembly, an end customer, etc.
- Add/delete products and update your current pre-selected list
- The lists can be private or shared among all your organization's Seco Online Store users

NAVIGATON AND PRODUCT LISTS

Find the right product

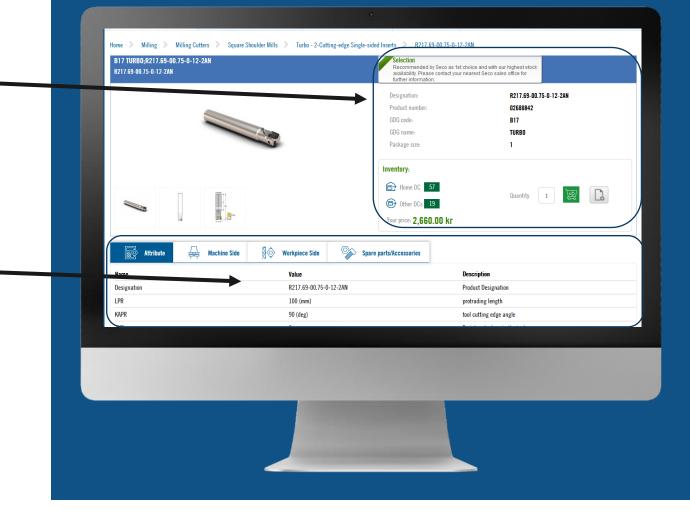

- Navigate through the top menu and find all our products in our respective categories
- Sort on "Selection" to find all products with best availability or "Name" (designation) to see the list in numeric order. Choose items per page or jump directly to one page
- Product information
- Prices
- Inventory levels are shown for your regional and global distribution centers
- Quantity and add to your current order

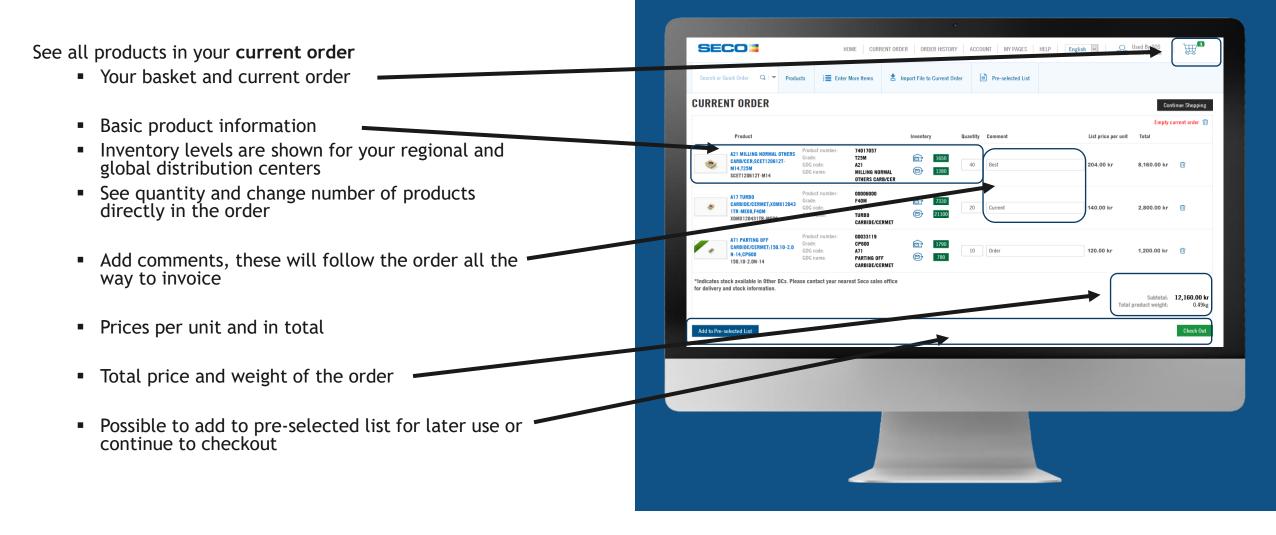

PRODUCT DETAIL PAGE

See all information related to that product

- Basic product information
- Prices
- Inventory levels are shown for your regional and global distribution centers
- Quantity and add to your current order or save to pre-selected list
- Tabs with more information and related products
 - Product attributes
 - Machine side products (if applicable)
 - Workpiece side products (if applicable)
 - Spare parts / Accessories (if applicable)

CURRENT ORDER

CHECKOUT & SHIPPING

(Specific functions differs from market to market)

Start checking out your order

- Choose address from your address book or create a new "One time" address (function differs from market to market)
- Choose shipping method, shipping mark and PO number
- Request a specific shipping date per order line or request a specific date for the entire order

ORDER HISTORY

A REMINDER

Your normal account will work

You will still use the same account, reach the same functions and see the same products after the upgrade.

If you need help?

If you encounter any problems, have a question or just need access? Reach out to your closest Seco representative.

Same place, new design

We will continue to have the same store availability, same address, same prices and real time stock availability as previously.
